

## TABLES AND FIGURES

### *Tables*

- 2.1 Macro-level indicators of material and institutional characteristics. 49
- 2.2 Attitudes toward the welfare state in six Western countries. 54
- 2.3 Attitudes toward the welfare state: model fit for four latent class models. 56
- 2.4 Welfare state indicator responses in the 4-cluster latent class model. 57
- 2.5 Attitudes toward the welfare state in six Western countries: cluster membership probabilities by country. 58
- 2.6 Attitudes toward the welfare state by class in six Western countries. 59
- 2.7 Association between size of welfare state class conflict (ccs & cta) and the HEA and HSE factors. 60
- 2.8 Attitudes toward the welfare state in six Western countries. Cell entries are cluster membership probabilities by class. 62
- 2.9 Class identity by class in six Western countries. 64
- 2.10 Attitudes toward the welfare state in six Western countries. Cell entries are cluster membership probabilities by class and class identity, and measures of association: mcs & iccs. 67
- 2.11 Association between size of welfare state class conflict (mcs & iccs) and HSE factors. 68
- 2.A1 Macro-level indicators of material and institutional characteristics. 71

2.A2	Correlation matrix. Macro-level indicators of material and institutional characteristics.	72
3.1	Regression models of general state intervention orientations and left–right self-placement.	96
3.2	Regression models of state intervention orientations.	97
3.3	Regression models of economic left–right self-placement.	99
3.4	Powell and Whitten’s measure of clarity of power dispersion.	100
3.5	How contextual power dispersion and welfare state regime types interact with the impact of welfare state dissatisfaction on state intervention orientations and left–right self-placement.	101
3.6	Regression models of having voted for the current government in the last election.	104
3.7	How contextual power dispersion and welfare state regime types interact with the impact of welfare state dissatisfaction on voting for the current government in the last election.	106
3.8	Country-specific regression models of political trust.	108
3.9	Regression model of political trust.	109
4.1	Comparisons of retrenchment trends in unemployment benefits and sickness insurance program.	123
4.2	Political alienation in four citizen categories.	131
4.3	Correlations between social risk position, difficulty in coping on present household income, and actual household income.	135
4.4	Social risk groups and political alienation.	137
4.5	Social risk and policy dissatisfaction.	139
4.6	Social risk, political dissatisfaction, and alienation.	141
5.1	Effects of welfare state dissatisfaction on political action in 14 countries.	160
5.2	Effects of evaluations of public school on welfare state-related political action in Sweden.	174
5.3	Effects of evaluations of health care on welfare state-related political action in Sweden.	175
5.A1	Effects of welfare state dissatisfaction on political action in 14 European countries.	179

6.1	Legitimate income differences in Sweden, Britain, Germany, and the United States, 1992 and 1999.	197
6.2	Class differences in attitudes to income redistribution in Sweden, Britain, Germany, and the United States.	200
6.3	Class differences in explanations for inequality in Sweden, Britain, Germany, and the United States.	203
6.4	Class differences in attitudes to what money should buy in Sweden, Britain, Germany, and the United States.	208
6.5	Correlations between indices among unskilled workers and Service class I in Sweden and the United States.	212
7.1	Nationalist sentiment, average index value.	236
7.2	Political patriotism, average index value.	239
7.3	Cultural patriotism, average index value.	239
7.4	Percentage with only one form of patriotism.	240
7.5	Correlations between national sentiment and xenophobia.	242
7.6	Correlations between national sentiment and protectionism.	244
7.7	Regression coefficients (multilevel structure) for nationalist sentiment.	247

*Figures*

2.1	Correlations between factors related to HEA and HSE.	50
4.1	Countries selected for analysis.	124
4.2	Four types of relations to politics.	129
6.1	Pay Spread Index, 1992–1999.	199
6.2	Income Redistribution Index, 1992–1999.	201
6.3	Conflict Index, 1992–1999.	205
6.4	Incentives Index, 1992.	205
6.5	Welfare Purchase Index, 1999.	209
6.6	Institutions, class stratification, and class articulation.	215
