DAVID H. BARLOW is professor of psychology and psychiatry, and founder and director emeritus of the Center for Anxiety and Related Disorders at Boston University. He received his doctorate from the University of Vermont in 1969 and has published more than five hundred articles and chapters as well as sixty books, mostly on the nature and treatment of emotional disorders. He was editor of *Behavior Therapy*, *Journal of Applied Behavior Analysis*, and *Clinical Psychology: Science and Practice*, and is currently editor-in-chief of the Treatments That Work series for Oxford University Press.

CAMINEE BLAKE, a clinical psychologist, is a staff psychologist in the Youth Service, Department of Psychiatry, Jewish General Hospital, and at the Home Ventilation Unit, Montreal Chest Hospital. She completed a postdoctoral fellowship in transcultural psychiatry at McGill University and another at Yale University, and she has a master of arts degree in experimental social psychology from Carleton University. She does research and clinical work in culture and mental health, with a special interest in the Caribbean community.

BYRON J. GOOD is professor of medical anthropology in the Department of Social Medicine, Harvard Medical School. He received his doctorate in anthropology from the University of Chicago in 1967. He is author of *Medicine, Rationality, and Experience: An Anthropological Perspective* (Cambridge University Press, 1994). Among his edited works with colleagues are *Postcolonial Disorders*, with Mary-Jo

DelVecchio Good, Sandra Teresa Hyde, and Sarah Pinto (University of California Press, 2008); *Subjectivity: Ethnographic Investigations*, with João Biehl and Arthur Kleinman (University of California Press, 2007); *Pain as Human Experience*, with Mary-Jo DelVecchio Good, Paul Brodwin, and Arthur Kleinman (University of California Press, 1994); and *Culture and Depression*, with Arthur Kleinman (University of California Press, 1985). He was editor-in-chief of *Culture, Medicine, and Psychiatry* from 1986 to 2005, and chair of the Department of Social Medicine at Harvard Medical School from 1999 to 2006.

PETER J. GUARNACCIA is professor in the Department of Human Ecology at Cook College and investigator at the Institute for Health, Health Care Policy, and Aging Research. He earned his doctorate in anthropology from the University of Connecticut in 1984. His research interests include cross-cultural patterns of psychiatric disorders, family strategies for coping with mental illness, and cultural competence in mental health organizations. Recent publications include “Are *Ataques de Nervios* in Puerto Rican Children Associated with Psychiatric Disorder?” published in the *Journal of the American Academy of Child and Adolescent Psychiatry* (2005, with Igda Martinez, Rafael Ramirez, and Glorisa Canino) and “It’s Like Going Through an Earthquake: Anthropological Perspectives on Depression Among Latino Immigrants,” published in the *Journal of Immigrant and Minority Health* (2007, with Igda M. Pincay).

ATHANASE HAGENGIMANA, a psychiatrist, attended medical school at the National University of Rwanda and completed his psychiatry residency at the University of Nairobi, Kenya. He currently works as an International Civil Servant with the United Nations, acting as chief staff counselor in the Ivory Coast. He was senior lecturer in psychiatry and psychology at the National University of Rwanda. He did postdoctoral studies at Harvard Medical School, where he was also an instructor and research fellow in psychiatry. He has been awarded fellowships from the Educational Commission for Foreign Medical Graduates, the Social Science Research Council, the Center for Advanced Holocaust Studies, and the John W. Kluge Center at the Library of Congress. His research interests include the psychological causes and consequences of violent conflict, specifically posttraumatic stress reactions.

ALAN HARWOOD is professor emeritus of anthropology at the University of Massachusetts, Boston. He received his doctorate in anthropology from Columbia University in 1967. In addition to authoring articles on medical anthropology, he is also author of the monographs *Witchcraft, Sorcery, and Social Categories Among the Safwa* (Oxford University Press, 1970) and *Rx: Spiritist as Needed: A Study of a*

Puerto Rican Community Mental Health Resource (Wiley Interscience, reprinted by Cornell University Press, 1987). He also edited the pioneering volume *Ethnicity and Medical Care* (Harvard University Press, 1981). In 1983 he received the Wellcome Medal of the Royal Anthropological Institute of Great Britain and Ireland for his research on the application of anthropology to medical problems. He was founding editor of the *Medical Anthropology Quarterly* and has edited series of books in medical anthropology for both Cambridge and Rutgers University Presses.

DEVONE. HINTON is a psychiatrist and medical anthropologist, and associate professor of psychiatry at Harvard Medical School and Massachusetts General Hospital. The subject of his doctoral thesis (Harvard University, 1999) was a panic syndrome occurring in Northeastern Thailand. He is fluent in Cambodian and Thai; conversant in Lao, Spanish, and Vietnamese; and director of a Southeast Asian Refugee Clinic in Lowell, Massachusetts. He is first author of more than fifty articles, most on panic disorder and related cultural syndromes among traumatized Southeast Asian refugees. He has also been editor of five special journal issues, on panic disorder, on sleep paralysis, on the medical anthropology of sensations, on music-based healing rituals, and on trauma-related nightmares. He is principal investigator of a National Institutes of Mental Health-funded grant to develop a culturally sensitive treatment for Cambodian refugees with posttraumatic stress disorder and comorbid panic attacks.

SUSAN D. HINTON has a bachelor's degree in anthropology and English from the University of California at Berkeley, and a master's degree in comparative literature with an emphasis on Latin American culture and literature, also from the University of California at Berkeley. She and her husband have three years of field research experience in Northeastern Thailand. She has coauthored several articles on cultural syndromes and panic disorder among Southeast Asian refugees.

ERIC JACOBSON received his doctorate in anthropology from Harvard University and is a medical anthropologist on the faculty of the Department of Social Medicine, Harvard Medical School. He investigates placebo phenomena and classical Asian medicines at the Osher Research Center and at Harvard Medical School. He has published articles and book chapters on placebo response in clinical trials, psychiatric aspects of Tibetan medicine, diagnostic reasoning in traditional Chinese medicine, and alternative therapies.

LAURENCE J. KIRMAYER is James McGill Professor and director of the Division of Social and Transcultural Psychiatry at McGill University and editor-in-chief of

Transcultural Psychiatry. He directs the Culture and Mental Health Research Unit at the Sir Mortimer B. David Jewish General Hospital in Montreal, where he conducts research on the mental health of indigenous peoples, on mental health services for immigrants and refugees, and on the cultural basis of psychiatric theory and practice. He is coeditor of *Understanding Trauma: Integrating Biological, Clinical, and Cultural Perspectives* (Cambridge University Press, 2008), *Healing Traditions: The Mental Health of Aboriginal Peoples in Canada* (University of British Columbia Press, in press), and *Encountering the Other: The Practice of Cultural Consultation* (Springer Science and Business Media, in press).

ROBERT KUGELMANN has a doctorate in psychology and is professor of psychology at the University of Dallas in Irving, Texas. He is author of two books, *The Windows of Soul* (Bucknell University Press, 1983) and *Stress: The Nature and History of Engineered Grief* (Praeger, 1992). His current research includes a book in progress, "Contested Boundaries: Psychology and Catholicism," and phenomenological research, both empirical and historical, on pain. Other areas of research and publication are critical health psychology and the history of psychology.

ROBERTO LEWIS-FERNÁNDEZ is director of the New York State Cultural Competence Center of Excellence and of the Hispanic Treatment Program at New York State Psychiatric Institute, and associate professor of clinical psychiatry at Columbia University. His research focuses on the sociocultural determinants of illness experience, on symptomatology, on help-seeking behavior, and on treatment outcome among U.S. Latinos diagnosed with anxiety, depressive, and dissociative disorders. Other research areas include the relationship between psychiatric diagnoses and Latino popular syndromes, sociocultural factors associated with treatment dropout, misdiagnosis of psychosis as a result of folk idioms of distress, symptom presentations of trauma-related disorders among Latino patients, and collaboration models between mental health and primary care medicine to increase access to culturally competent care for consumers with psychiatric disorders.

MICHAEL LIEBOWITZ is professor of clinical psychiatry at Columbia and managing director of the Medical Research Network, a private clinical trials facility. He graduated from Yale College and Medical School and did his psychiatric training at the Medical Center Hospital of Vermont and Columbia University. At Columbia he started the Anxiety Disorders Clinic, which he directed from 1982 until 2006. His research interests include classification and treatment of atypical depression, social anxiety disorder, panic disorder, and obsessive-compulsive disorder. He chaired the *DSM-IV* workgroup on anxiety disorders and developed the Liebowitz

Social Anxiety Scale. He has authored or coauthored more than 250 peer-reviewed publications.

IGDA E. MARTÍNEZ is a doctoral candidate in clinical psychology at the Graduate School of Applied and Professional Psychology of Rutgers University. Her research interests in Latino mental health have led to several collaborations, including “Culture-Specific Diagnoses and Their Relationship to Mood Disorders,” a chapter in *Diversity Issues in the Diagnosis, Treatment, and Research of Mood Disorders* (Oxford University Press, 2008, with Peter J. Guarnaccia); and “Mental Health in the Hispanic Immigrant Community: An Overview,” a chapter in *Mental Health Care for New Hispanic Immigrants: Innovative Approaches in Contemporary Clinical Practice* (Haworth Press, 2005, with Peter J. Guarnaccia and Henry Acosta), among other recent publications.

LAWRENCE PARK is director of inpatient services at Massachusetts General Hospital (MGH) and lecturer at Harvard Medical School. He also serves as MGH site director of the International Training Program in Mental Health of the Department of Social Medicine at Harvard Medical School. He received a master’s degree in cross-cultural psychiatry at the Committee on Human Development at the University of Chicago, and earned his doctorate in medicine at the University of Wisconsin Medical School. His research interests include mental illness and mental health policy in China.

ESTER SALMÁN graduated from Manhattan College with a bachelor of science degree in psychology and was inducted into Psi Chi (the National Honor Society in Psychology) and Sigma Xi (the Scientific Research Society). In 1990 she began working in clinical psychiatry at the Columbia University Clinic for Anxiety and Related Disorders, where she later founded the Hispanic Treatment Program. While at Columbia University she served as co-investigator for several National Institutes of Mental Health-sponsored grants focusing on culture and psychiatric disorders, and as a result authored several peer-reviewed scientific journal publications as well as chapters in books devoted to Latino mental health issues.

ANDREW B. SCHMIDT received his master’s degree in clinical social work from New York University and is enrolled in the doctorate in social work program at Hunter College, City University of New York. He works as a technical specialist in the Anxiety Disorders Clinic at the New York State Psychiatric Institute. In this role he provides oversight and technical supervision for all data-related activities associated with the multiple research studies conducted at the clinic. He is also

coauthor of papers on obsessive-compulsive disorder, social phobia, and ethnic disparities of mental health care.

PICHET UDOMRATHN received his doctorate in medicine from the Prince of Songkla University in Southern Thailand and is professor of psychiatry there. He is president of the Association of Southeast Asian Nations Federation for Psychiatry and Mental Health and of the Psychiatric Association of Thailand. He is a former editor of the *Journal of the Psychiatric Association of Thailand* and has authored more than one hundred publications, including books, research, reviews, and special articles. His major fields of interest and research are anxiety and mood disorders, particularly panic disorder; schizophrenia; sleep disorders; geriatric psychiatry; psychopharmacology; and medical education. He is the pioneering researcher on panic disorder as it presents in Thailand, and his book on panic disorder written in the Thai language is now a standard text in that country.
