

Figures and Tables

FIGURES

I.1	Traditional perspective on the relationship between education and society	9
I.2	Schooled society (neo-institutional) perspective on the relationship between education and society	11
1.1	Number of students in primary, secondary, and higher education worldwide	24
1.2	How long can children expect to stay in school? Average school life expectancy, in years, for primary to secondary education, by country, 2001	26
1.3	Examples of synergistic cultural meaning from core values of education as an institution	34
4.1	Growth trends in university graduate study in the U.S., 1970-2004	95
6.1	Proportion of total employment of professional, technical, and kindred workers, 1910-2000	134
7.1	Four processes of institutionalization of educational credentials within the occupational structure	163
7.2	Educational credential requirements among growing and declining U.S. occupations, 2004-2006	164
7.3	Percentage of U.S. workers in licensed versus unionized jobs, 1950-2006	166
7.4	Impact of educational degrees versus years of schooling on occupational prestige in the U.S., 1950-2008	180
8.1	Mean number of problem-solving strategies and their conceptual abstraction in U.S. mathematics textbooks	193

FIGURES AND TABLES

8.2	Distribution of upper secondary academic tracks/programs worldwide, by historical period	197
8.3	Decline of classical language and rise of foreign languages taught in national curricula worldwide	203
8.4	Prevalence of foreign language education in grades 1 to 8, circa 2000, by world region	204
9.1	U.S. high school regular diploma and GED completion rates by age 24, 1930–2000	224
9.2	Attainment of high school diploma by 1992 of national sample of 1980 U.S. high school sophomores, by race	240

TABLE

7.1	U.S. architects, professional associations network: Constructing and intensifying educational credentialing via licensure	167
