

## LIST OF TABLES AND FIGURES

### *Tables*

- 1.1 Structural changes and youth unemployment 11
- 1.2 Distribution of educational degrees among recent school leavers 21
- 2.1 Data sources 50
- 3.1 Distribution of education degrees across school leaver cohorts, East Germany 70
- 3.2 Social selectivity of educational attainment (predicted probabilities), East Germany 71
- 3.3 Time until first significant job and occupational status of first significant job, East Germany 74
- 3.4 Occupational status in first job by educational group, most recent education leaver cohorts 2001–2007, East Germany 78
- 3.5 Transition out of first significant job, East Germany 80
- 4.1 Social selectivity of educational attainment (predicted probabilities), Czech Republic 98
- 4.2 Survivor functions of entry into first significant job, most recent education leaver cohorts 2001–2007, Czech Republic 101
- 4.3 Time until first significant job and occupational status of first significant job, Czech Republic 102
- 4.4 Occupational status in first job by educational group, most recent education leaver cohorts 2001–2007, Czech Republic 105
- 5.1 Social selectivity of educational attainment (predicted probabilities), Croatia 123
- 5.2 Time until first significant job, Croatia 126

- 5.3 Occupational status in first job by educational group, Croatia 130
- 5.4 Occupational status of first significant job, Croatia 131
- 5.5 Transition out of first significant job, Croatia 134
- 6.1 Social selectivity of educational attainment (predicted probabilities), Serbia 152
- 6.2 Time until first significant job, Serbia 155
- 6.3 Occupational status in first job by educational group, Serbia 158
- 6.4 Occupational status of first significant job, Serbia 159
- 6.5 Transition out of first significant job, Serbia 162
- 7.1 Time until first significant job, Slovenia 178
- 7.2 Occupational status in first job by educational group, most recent educational leaver cohorts 1999–2006, Slovenia 180
- 7.3 Occupational status of first significant job, education leaver cohorts 1999–2006, Slovenia 181
- 7.4a First significant job duration and exit to new employment (1991–2006), Slovenia 184
- 7.4b First significant job duration and exit to unemployment (1991–2006), Slovenia 185
- 8.1 Distribution by levels of education when respondents *first* left school; and survivor functions of entry into first significant job for those who left school after 1999, Hungary 199
- 8.2 Social selectivity of educational attainment (predicted probabilities), those who left school after 1999 only, Hungary 202
- 8.3 Time until first significant job, Hungary 204
- 8.4 Transition out of first job, Hungary 207
- 8.5 Average log net monthly earnings in respondents' current jobs and occupational class distribution by education, only those who left school after 1999, Hungary 211
- 8.6 Determinants of log net monthly earnings in respondents' current jobs, only those who left school after 1999, Hungary 212
- 9.1 Social selectivity of educational attainment (predicted probabilities), Poland 226
- 9.2 Time until first significant job, Poland 229

- 9.3 Occupational status in first job by educational group, Poland 232
- 9.4 Occupational status of first significant job, Poland 233
- 9.5 Determinants of first significant job duration, Poland 236
- 10.1 Social selectivity of educational attainment (predicted probabilities), Estonia 252
- 10.2 Time until first significant job, Estonia 256
- 10.3 Occupational status in first job by educational group and education leaver cohorts, Estonia 259
- 10.4 Occupational status of first significant job, Estonia 261
- 10.5 Transition out of first significant job, Estonia 264
- 11.1 Social selectivity of educational attainment (predicted probabilities), Ukraine 281
- 11.2 Time until first significant job, Ukraine 284
- 11.3 Occupational status in first job by educational group, Ukraine 287
- 11.4 Occupational status of first significant job, Ukraine 289
- 11.5 Transition out of first significant job, Ukraine 291
- 12.1 Level of education by school leaver cohorts, Russia 307
- 12.2 Time until first significant job, Russia 311
- 12.3 Determinants of first occupational position (results of the multinomial logit regression), Russia 314
- 13.1 Relative performance of different groups of secondary graduates compared to upper secondary vocational graduates, in terms of entry to and occupational status of first job 330
- 13.2 Advantages and disadvantages of lower vocational graduates compared to lower and upper secondary graduates in terms of entry speed to and occupational status of the first job 333
- 13.3 Relative performance of different groups of post-secondary graduates compared to upper secondary vocational graduates in terms of entry speed to and occupational status of first job 339

*Figures*

- 3.1 Survivor functions of entry into first significant job, most recent education leaver cohorts 2001–2007, East Germany 72
- 5.1 Survivor functions of entry into first significant job by broad education group, Croatia 125
- 6.1 Survivor functions of entry into first significant job, Serbia 154
- 7.1 Survivor functions of entry into first significant job, education leaver cohorts 1991–2006, Slovenia 176
- 9.1 Survivor functions of the entry into first significant job, Poland 228
- 10.1 Survivor functions of entry into first significant job, education leaver cohorts 1997–2003, Estonia 254
- 11.1 Survivor functions of entry into first significant job, Ukraine 283
- 12.1 Survivor functions of entry into first significant job, by school leaver cohort and education, Russia 309
- 13.1 Evolution of education effects on entry speed to and occupational status of first job for cohorts entering employment under socialism and capitalism, Czech Republic, Estonia, and Russia 324
- 13.2 Overall size of post-secondary education sector and relative performance of higher tertiary graduates compared to lower tertiary graduates (including post-secondary vocational tracks) in terms of entry speed to and occupational status of first significant job 342
- 13.3 Relative size of higher tertiary programs and relative performance of higher tertiary graduates compared to lower tertiary graduates (including post-secondary vocational tracks) in terms of entry speed to and occupational status of first significant job 342
- 13.4 Employment growth in the service sector and relative performance of higher tertiary graduates compared to upper vocational graduates in terms of entry speed to and occupational status of first significant job 343
