Figures

1	A trajectory model of participation	10
2	Percentage of respondents by number of survey periods active in contentious politics	27
3	Percentage of respondents active in contentious politics by survey year	28
4	Percentage chance of engaging in contentious politics by marital status	33
5	Percentage chance of engaging in contentious politics by work hours per week	34
6	Percentage of participants by trajectory of participation	50
7	Sample of social movement organizations	61
8	Predictors and consequences of an activist identity	109

Tables

1	Comparison of total sample and participants in contentious political action	29
2	Random and fixed effects models predicting engagement in contentious politics	31
3	Descriptive background variables by trajectory	51

4	Multinomial logistic regression model predicting trajectory of participation	53
5	Sample characteristics by group	68
6	Participation over time by group	81
7	Prerecruitment ties to rank-and-file members by trajectory of participation	88
8	Effect of recruiter type on trajectory of participation for hierarchical groups	89
9	Interaction with fellow participants after disengagement from focal group by group	101
10	Independent sample t-tests between select variables and the presence of an activist identity and participation	110
11	Factors leading to the development of an activist identity by group	112
A1	Coding of participation trajectory	140
A2	Schedule of interview questions	144
A3	Interview sample information	146
