Preface	xv
Acknowledgments	xvii
List of Abbreviations	xxi
<b>1. Rising Powers</b>	<b>1</b>
Why This Book? The Rise of These Two Powers Is Stressing the Global System	1
Structure of the Book: Review the Past to Get Insights into the Present and the Future	4
<b>2. Insights from History of Power Shifts and Growing Interdependence</b>	<b>8</b>
Conflicting Theories Provide Relevant Perspectives	9
This Book Uses a Broad Framework to Analyze and Track Power Shifts	14
2000-Year Overview of the Rise and Decline of Power Shows Frictions Spiral into Wars and Changes of the Global System	38
There Have Been Significant Shifts in Economic Size Even in the Last 30 Years	41
Conclusion: The History of Power Shifts Is Not Reassuring	42

3. Understanding the Rapid Rise of China and India	45
Basic Comparisons	46
Some Similarities in Otherwise Very Different Histories	48
A Macroaccounting for the Differences in Growth	50
The Type and Role of Government	53
Two Contrasting Growth Strategies	56
Acquiring Technology from the Rest of the World	65
Conclusion: Both Countries' Growth Is Largely Driven by Technological Catch-Up and Participation in the International System	71
4. Positive Growth Prospects for China and India	74
The Impact of the 2008–2009 Financial Crisis on China and India	75
Long-Term Projections for Growth of China and India	76
China and India Face Daunting Challenges	79
Both Countries Are Increasing Their Competitiveness	93
Part of Their New Competitive Advantage Is Their Growing Critical Mass in Higher Education	94
They Are Also Moving from Imitation to Innovation	99
Both Countries Are Likely to Continue to Grow Much Faster Than the World Average for the Next Two Decades	109
5. Growing Economic and Geopolitical Impact	112
Positive and Negative Impact Through Increased Trade	113
From China's Trade Surpluses to Global Imbalances	126
Growing Foreign Direct Investment (FDI)	135
A Tilted Technology Playing Field	143
Growing Geopolitical Impact of the Rise of China	149
6. Environmental and Natural Resource Impact	154
China and India Are Resource Poor	155
The Rapid Growth of China and India Combined with Their Large Populations Is Creating Global Environmental Sustainability Problems	161
China and India Will Account for the Majority of Global Increase in Energy Demand and CO <sub>2</sub> Emissions from 2008 to 2035	163
There Is a Stalemate on Action to Deal with Climate Change Because It Is a Zero-Sum Game	171

Technological Innovation Is a Way to Break the Climate Change Deadlock, but Not Enough Investments in R&D Are Being Made	175
There Is Also Increasing Pressure on the Environment from the Growth of Other Developing Countries	180
<b>7. Power Shifts and Rising Frictions Have Implications for the Global System and the United States</b>	<b>182</b>
The Rapid Rise of China and India Is Putting Pressure on the Global Governance System	183
Growing Friction Areas Are Beyond the Current Capabilities of the International System	183
Risks That Frictions May Lead to Greater Problems	189
Evolution Within the Existing System or the Rise of a New System?	198
What Can/Should the United States Do?	205
<b>8. How Will the World Adjust to the Swift Ascent of China and India?</b>	<b>209</b>
Alternative Scenarios	209
Moving Toward a More Sustainable System	214
Implications for Other Developing Countries Vary	229
Conclusion: The Main Powers Need to Take Stronger Actions to Ensure a More Sustainable and Equitable Global System	232
