PART I: Market Menagerie: Planning the Health of Late Industrial Development	
Introduction	1
Health and Development in Late Industrial States	1
Barbarians at the Gate: Late Industrial Supply	8
Data, Methods, and Structure	19
The Chapters Ahead	22
Appendix: Sample Questions	28
1 Well Beyond Market Failure	32
A Time for Integration: Evolution of States and Markets	32
Technology's Insights for Markets	33
Extant Systems and the Weakness of Ideology for Reform	34
Beyond Minimalism	37
Bringing an Evolutionary Perspective to Development	39
The Fine Touch	50

	PART II: 1950–2000: Indian Market Menagerie	
2	The First Market Environment: Trouble in the Making	55
	Phase I, 1950–1970s: Coveted Universalism, Controlled Markets	55
	A Crucible for Learning: The Public-Sector Effort	57
	Nehruvian Efforts in the Manufacture of Medicines	61
	The Public-Sector Legacy Today	65
3	“Essential” Markets, Public Health, and Private Learning	67
	The 1970s and 1980s	67
	Process Patents	70
	Price Controls	72
	Monopolies, MNCs, and Accelerated Indian Learning	74
	Trouble in the Making: The New Drug Policy and Production	75
	Taking Stock	79
4	Demand and Democracy	84
	The Institutional Unraveling of Industrial Planning	84
	Planning for the Nation’s Heartland and Outposts	85
	Demand and the Health of Health-Care Financing	86
	Industrial Slowdown and Fiscal Inertia	88
	Universalism and Demand Identities: From Control to Dissipation	90
	The Reemergence of Nonmarket Institutions	92
	The Ragged Edges of Consumption and Delivery	95
5	The Second Market Environment: Learning by Proving in Global Regulatory Harmonization	99
	National Universalism and Global Nationalism: The State’s Loosening Hold on the Domestic Market	99
	Institutional Shifts to Global Nationalism	102
	Expansionist Market Tiers	109
	Growing Innovation, but Not Access?	116
	Looking Ahead	119

6	Demand as Necessary but Not Sufficient: Vaccine Procurement Markets	121
	Vaccines	121
	Health for Some: The Development Mandate	122
	International Procurement Markets: Beyond Government Failure	124
	Procurement's Effect	126
	Fine-Tuning Demand Policy Instruments	128
	Learning by Proving: Health Policy as Industrial Policy	131
7	The Third Market Environment: Uncertain State of New Technologies	135
	Bringing the State Back into the Process	135
	Process, Process: New Technologies Ahoy!	137
	Advances Nevertheless	143
	New Technology Maps and Blurred Market Signposts: Organizational Vignettes	145
	Finally, Niches and Local Relevance	156
	New Interactions for Old Players	158
PART III: The Institutional Basis for Industry and Health		
8	Health Technologies in Comparative Global Perspective	163
	Instituting Welfare Regimes: Building the Double Movement	163
	Pharmaceutical's Historical Advance: Early Capabilities, Early Welfare	165
	Private Property Markets	168
	Collective Rights and Markets in Welfare Institutions	169
	Varieties of Health-Care States	171
	Late Industrial Suppliers: Marrying Late Capabilities with Later Welfare	174
	Revisiting the Institutional Triad	179
	Moving Forward: Transitioning Developmental States	182

9	Markets and Metropolis	186
	The Design of (Re)distribution	186
	Nation and City in Development	189
	Universalism in Federalism: Between Capitalism and Commune	192
	Industrial Welfare and the City in Context	196
	Cities, Antibiotics, and Universalism	199
	From Poor Law to Welfare Paternalism in England and India	201
	Ahmedabad, circa 1915	202
	The Body Corporal and Politic: Utopias in Universalism	204
	The Quest for Healthy Places	208
	Nations and Cities: An Evolving Social Contract?	211
	Limited Double Movement: Contractualism and Bo(u)nds of Exchange	214
	Conclusion: Soft Determinism in the Market Menagerie	219
	Infusing Evolution into Economic Plans	219
	Planning Process and Outcomes	222
	Soft Determinism in a New Pharmaceutical World	228
	Intervening in Variety	230
	Evolution and Orchestration of the Social Contract	238
	Market Variety and Morality: Planning with Small and Large “P”	242
	Notes	247
	Index	311
