

Figures

1.1	BRIC countries: A model of forces affecting the shape of change in higher education	18
2.1	China: Number of entrants into higher education institutions by type of institution, 1997–2010	49
2.2	Brazil: Proportion of higher education enrollment in public, private, and public federal institutions, 1980–2010	58
2.3	Russia: Higher education enrollment in public institutions, fully subsidized places and fee paying, 1995–2010	67
2.4	Russia: Specialist graduates from public Russian higher education universities, economics & management and technical fields, 1990–2010	68
3.1	China: Male age-earnings profiles, by level of education and engineering graduates, 2005	86
3.2	Russia: Male age-earnings profiles, by level of education and engineering graduates, 2005	94
3.3	India: Male age-earnings profiles, by level of education and engineering graduates, 2006	97
3.4	Brazil: Male age-earnings profiles, by level of education and engineering graduates, 2000	101

4.1	BRIC countries: Total of private plus public spending in higher education per student, by country, 2000–2009	113
4.2	BRIC countries: Ratio of total spending per student on university to primary school, by country, 2000–2009	114
4.3	China: Spending per student by type of institution, 1994–2010	117
4.4	India: Public spending per student in technical education and total higher education, 1991–2009	122
4.5	India: Trends in government spending per student in Indian institutes of technology, 1999–2008	126
4.6	Brazil: Public spending per public higher education student, average private tuition in private higher education, and average spending per student, 2000–2010	130
4.7	Russia: Estimated public spending per “budget place” student in public higher education and estimated tuition fees for fee-paying students in public universities, 2000–2010	134
4.8	Russia: Estimated public spending per “budget place” student in public higher education, by category of university, 2006–2010	135
6.1	China: Comparison of average college entrance exam scores by province, new undergraduate enrollees in engineering versus nonengineering majors, 2009	197
6.2	Russia: Family income of university students from household and student survey data, 2009–2010	200
7.1	BRIC countries: Number of bachelor’s-degree-level enrollments, elite versus nonelite institutions, 1999–2009	218
7.2	BRIC countries: Number of bachelor’s-degree-level engineering (includes computer science) enrollments, elite versus nonelite institutions, 2003–2009	219
7.3	Brazil: ENADE computer science specific skills test, first-year kernel distribution compared to fourth-year kernel distribution, 2008	238
7.4a	BRIC countries: Number of university graduates, elite versus nonelite institutions, 2006 and 2009	240
7.4b	BRIC countries: Number of engineering (includes computer science) graduates, elite versus nonelite institutions, 2006 and 2009	241

7.5	BRIC and comparison developed countries: Total R&D spending in higher education, 1999–2010	246
7.6	BRIC and comparison developed countries: R&D spending per student, 2010	247
8.1	Brazil: Public spending on higher education per student, by student’s family income category, 2002 and 2007	273
8.2	Brazil: Distribution of total public subsidy on higher education by student’s family income category, 2002 and 2007	274
8.3	Russia: Distribution of total public subsidy on higher education by student’s family income category, 2010	281
