

Tables

2.1	Higher education enrollment per 100,000 population: Europe, Japan, United States, and BRIC countries, 1920–2010	37
2.2	India: Enrollment by field of study, 1990–2010	54
2.3	Brazil: Ratios of applications and unfilled places to available places, by type of institution, 1994–2010	61
2.4	Brazil: Higher education engineering and computer science graduates, 1999–2010	62
3.1	BRIC countries: Gross enrollment rates in secondary and higher education, 1970–2009	81
3.2	China: Estimated private annual rates of return for education, by level of education and gender, 1988–2005	84
3.3	Russia: Estimated private annual rates of return for education, by level of education and gender, 1985–2002	92
3.4	India: Estimated private and social annual rates of return for education, by level of education and gender, 1965–2006	96
3.5	Brazil: Estimated private and social annual rates of return for education, by level of education and gender, 1970–2008	100
4.1	China: Tuition charges (yuan) for different university tiers, 2009	116
4.2	India: State-prescribed annual fees for private college undergraduate programs in engineering, by state, 2006–2007 and 2011–2012	123

5.1	India: Types of higher education reform, by roles, outcomes, and period	152
5.2	India: Autonomy of departments within engineering colleges, by type of college	154
5.3	India: General characteristics of colleges, by type of college	157
5.4	Russia: Types of technical universities, by their attitude toward and reaction to recent contextual changes and state reforms	167
6.1	The United States and the BRIC countries: Number of courses required in high school by subject type	188
6.2	Russia: Unified student entrance examination score comparison, by select majors, 2011	199
6.3	Brazil: ENADE first-year university scores of engineering and other students on test of general ability, 2005	201
6.4	Brazil: Student demographics for combined engineering and computer science majors and combined all other majors, 2005	202
6.5	Stanford University and the BRIC countries: Percentage of courses taken by computer science majors (bachelor's degrees) by course category	206
7.1	BRIC countries: Ph.D. graduates (total and engineering only), by country, 1998–2009	223
7.2	BRIC countries: Higher education professors with Ph.D.s, by country and type of institution, 2001–2010	225
7.3	Brazil: Estimated inter-cohort and intra-cohort test score gains in computer science and electrical engineering, 2005 and 2008, for students entering in least and most selective programs	239
7.4	United States and the BRIC countries: S&T papers indexed by SCI, EI, and ISTP, 2009	248
8.1	BRIC countries: Income distribution, 1980–2009	265
8.2	BRIC countries: Average years of schooling in the labor force and standard deviation of years of schooling, 1980–2008	266
8.3	BRIC countries: Private rates of return for secondary and higher education, 1980–2008	266

8.4	BRIC countries: Contribution of components of educational change to changes in income distribution, 1980–2008	267
8.5	Brazil: Estimated net public subsidies per student in higher education, 2002 and 2007	272
8.6	Russia: Estimated average higher education public subsidy per student by per-member family income of students, 2010	279
8.7	Russia: Income distribution, distribution of students by income group, and distribution of government higher education subsidies by income group, 2010	280
