

Acknowledgments

This volume has been several years in the making, and we wish to record, with deep appreciation, the many debts we have incurred throughout this period.

The chapters in the volume originated as papers presented in September 2000 at the International Symposium on “*Economy and Society: Max Weber in 2000*,” organized by the International Institute at the University of Wisconsin, Madison. The institute provided staff and financial support for the Symposium. The Consulate General of the Federal Republic of Germany also gave valuable assistance for the event. Consul General Michel Engelhard encouraged the project and introduced the symposium, and consulate financial support made possible the substantial participation of German scholars in the Symposium. Additional support came from the Max Kade Foundation, the Anonymous Fund at the University of Wisconsin, Madison, and from several other units of the University: the Center for German and European Studies, the Institute for Legal Studies, the Departments of German, History, and Sociology, and the Religious Studies Program. We gratefully acknowledge the generous help we received from all these sources.

Earlier versions of several chapters have subsequently appeared in print. A previous version of Chapter 3 was published in *History and Theory* 39 (October 2000; volume 39, pp. 364–83) and appears here by permission of the author. A version of Chapter 9 was published in the *American Sociological Review* (December 2002; volume 67, pp. 832–53) and is reprinted here by permission of the author and the American Sociological Association. Portions of Chapter 11 appeared in Philip S. Gorski, *The Disciplinary Revolution: Calvinism and the Rise of the State in Early Modern Europe* (2003), and are published here by permission of the author and the University of Chicago Press. Finally, an earlier version of Chapter 12 was published in the *Journal of Classical Sociology* (September 2001; volume 1, pp. 171–94) and appears here by permission of the author.

This undertaking would not have been possible without the generous

xii Acknowledgments

help of Guenther Roth, the intellectual force behind the complete English-language edition of Max Weber's *Economy and Society*, which first appeared in 1968. The doyen of Weber scholars and a gracious friend to generations of Weberians, he kindly lent us his wise counsel, in matters large and small, from the time we began planning our symposium until we sent this volume to press, patiently and skillfully diverting our missteps and steering us toward a better course. For this and much else, we are enormously thankful, and we gratefully dedicate this volume to him.
