

## TABLES AND FIGURES

### *Tables*

- 1.1 China's ranking in income inequality in the World (Gini index) 7
- 2.1 Changes in types of employment, urban China, 1952–2000 27
- 2.2 Wage differences among staff and workers of different ownership types, urban China, 1978–2000 33
- 2.3 Wage differences among staff and workers of different industries, urban China, selected years 36
- 3.1 Characteristics of urban households, three provinces of China, selected years 52
- 3.2. Selected characteristics of household heads and spouses, urban China, three provinces 56
- 3.3 Factors affecting employment in non-public sector, spouse of household head, urban China, selected periods 57
- 3.4 Rising income: Changes in mean yearly income among urban employees 61
- 3.5 Improvements in housing space, three provinces, urban China, 1986–2000 67
- 3.6 Income inequality among urban Chinese employees, 1986–2000 71
- 3.7 Income inequality among urban Chinese residents, 1986–2000 72
- 3.8 Income inequality among urban Chinese income earners, 1986–2000 73
- 3.9 Housing inequality in urban China 81
- 3.10 Income growth at the top and the bottom of the distribution 87

- 4.1 Annual per capita household income, urban and rural China, 1985–2000 95
- 4.2 Income inequality within China's two largest groups: rural and urban (Gini index) 97
- 4.3 Share of income inequality (percentage of Theil index), ownership type and industrial sector, urban China, 1986–2000 103
- 4.4 Categories as explanatory variables: urban income inequality, China, 1988 and 1995 107
- 4.5 Relative importance of the determinants of income, urban China, 1988 and 1995 108
- 4.6 Individual- and city-level factors of income differentials, large cities in China, 1998 112
- 4.7 Individual and work organization factors of income differentials, 10 cities, 1992 116
- 4.8 Changing importance of seniority, education, and occupation in income, 1986–2000 124
- 5.1 Perceptions of global and local inequalities, urban China 167
  - A.1 Measuring income in urban China 186
  - A.2 Comparison of employment characteristics between national and survey data (%) 188
  - A.3 Income-level comparison between three provinces and national samples 190

*Figures*

- 3.1 Changing patterns of employment, urban China, three provinces, 1990 and 2000 55
- 3.2 Changes in cost of living, urban China, three provinces, 1985–2000 62
- 3.3 Declining importance of base wage among state and collective employees 64
- 3.4 Trends in urban income inequality, three measures, China, 1986–2000 74
- 3.5 Trends in urban employee income inequality, three provinces, 1986–2000 78
- 3.6 Divergence in housing and income inequality, urban China, 1986–2000 82
- 3.7 Changing income disparity, urban China, 1986–2000 86

- 3.8 Rising urban poverty, province as reference, China, 1986–2000 88
- 3.9 Rising urban poverty, city as reference, China, 1986–2000 89
- 4.1 Rising inter-provincial inequality, urban China, 1986–2000 99
- 4.2 Rising inter-provincial inequality, three urban provinces, 1986–2000 99
- 4.3 Rising inter-city inequality, urban China, 1986–2000 101
- 4.4 Rising inter-city inequality, three urban provinces, 1986–2000 101
- 4.5 Gender penalty in income, urban China, 1986–2000 (unadjusted) 119
- 4.6 Gender penalty in income, urban China, 1986–2000 (adjusted) 120
- 5.1 Decomposition of income inequality, urban China and the United States 134
- 5.2 Increasing local government capital investment, 1985–2000 137
- 5.3 Trend in local government expenditure, China, 1953–1998 138
