

TABLES AND FIGURES

Tables

- 2.1. Percent of Adults Who Agreed Minus the Percentage Who Disagreed with Five Statements about Distributive Justice: Japan, West Germany, Great Britain, and the United States in 1991 26
- 2.2. Coefficients of Father's Occupation and Family Income in 1957 when Predicting Children's Occupation, Earnings, and Family Income in 1991–92 Using Various Controls in the Wisconsin Longitudinal Survey 30
- 3.1. Quantile Regression Results for the UK Dependent Variable: Logarithm of Wage 67
- 3.2. Quantile Regression Results for the United States Dependent Variable: Earnings 68
- 3.3. United States: Data for Tests of Equality of Opportunity 70
- 3.4. United States: Summary of Tests of Equal Opportunity 75
- 3.5. Britain: Data for Tests of Equal Opportunity 76
- 3.6. Britain: Summary of Test of Equal Opportunity 80
- 5.1. Correspondence of the Classes of the Goldthorpe Schema and of the NS-SEC Socioeconomic Classification and Common Descriptive Terms 110
- 5.2. Components of Average Gross Weekly Earnings, Men in Full-time Employment, 1975 and 1998 118
- 7.1. Changes in Family Income and Household Wealth by Racial Group 171
- 7.2. Components of the Composite Income and Wealth Variables 172
- 7.3. Changes in Family Income and Household Wealth by Racial Group, Restricted to Families with College Eligible Children Between the Ages of 17 and 21 174

- 7.4. Estimated Logit Coefficients for the Effects of Income and Wealth on College Enrollment in November of 1986 and 1996 for SIPP Respondents Ages 17 to 21 175
- 7.5. Estimated Logit Coefficients for the Effects of Income and Wealth on College Enrollment in November of 1986 and 1996 for SIPP Respondents Ages 17 to 21 with Covariates for Parental Education 176
- 7.6. Estimated Logit Coefficients for the Effects of Social Class on College Enrollment in November of 1986 and 1996 for SIPP Respondents Ages 17 to 21 179
- 8.1. Indicators of Educational Trends for Taiwan and the United States 206
- 8.2. Fit of Models of Mother's and Father's Schooling Effects 208
- 8.3. Effects of Mother's and Father's Schooling on Odds of Making Schooling Transitions 215
- 8.4. Fit of Models of Sex Interactions with Mother's and Father's Schooling Effects 216
- 8.5. Effects of Mother's and Father's Schooling and Sex on Odds of Making School Transition 218
- 8.6. Fit of Models of Sibship Size Interactions with Mother's and Father's Schooling and Sex Effects 223
- 8.7. Effects of Mother's and Father's Schooling, Sex, and Number of Siblings on Odds of Making School Transitions 224
- 9.1. Probability of Class Position, Conditional on Educational Attainment, All Men Ages 35–60 in England and Wales 246
- 9.2. Multinomial Logit Regression Models on T3 248
- 9.3. Multinomial Logit Regression Models on T2 249
- 9.4A. Probability of Entering First Class Positions, Conditional on Educational Attainment, All Men Ages 35–60 in England and Wales 253
- 9.4B. Probability of Class Position at Age 23, Conditional on Educational Attainment, Men in England and Wales 253
- 9.4C. Probability of Entering First Class Position at Age 33, Conditional on Educational Attainment, Men in England and Wales 253
- 10.1. Factor Loadings 270
- 10.2. Effects of PSES and 1980 Education on Ability 275
- 10.3. Outcome: ed90 277
- 10.4. AFQT Model 280
- 10.5. Bock & Moore Model 281

- 10.6. New Model 282
- 11.1. List of Covariates 310
- 11.2. Goodness of Fit Test for Lifetime Earnings 315
- 11.3. Ex Post Conditional Distribution (College Earnings Conditional on High School Earnings) 318
- 11.4. Average Present Value of Earnings for High School Graduates Fitted and Counterfactual, White Males from NLS79 322
- 11.5. Average Present Value of Earnings for College Graduates Fitted and Counterfactual, White Males from NLS79 323
- 11.6. Average Present Value of Earnings for People Indifferent Between High School and College Conditional on Education Level, White Males from NLS79 325
- 11.7. Mean Monetary Value of Total Cost of Attending College 327
- 11.8. Agent's Forecast Variance of Present Value of Earnings Under Different Information Sets 328
- 11.9. Mobility of People Affected by Cross-subsidizing Tuition 333
- 11.10. Mobility of People Affected by Cross-Subsidizing Tuition, Fraction of the Total Population Who Switch Schooling Levels 335
- 11.11. Mobility of People Affected by Cross-subsidizing Tuition Across Counterfactual Distributions 337
- 11.12. Voting Outcome of Proposing Cross-subsidizing Tuition 339
- 12.1. Estimates of $\hat{\rho}^j$ Based on Pseudo-panels Constructed from the Cross-sectional Wage Structure Survey (WSS), 1990–2000, and the Urban Worker Household Income and Expenditure Survey (UWH), 1994–2000 355
- 12.2. Estimates of Persistence Parameter, $\hat{\rho}^j$, for Two Panel Data Sets, the Korea Labor Institute Panel Study data (KLIP), and the Korea's Urban Worker Household Income and Expenditure Survey (UWH) 360
- 12.3. Estimates of Persistence Parameter: Comparison Between the Cross-sectional WSS and Panel KLIP 361
- 12.4. Estimates of the Persistence Parameter Based on UWH: Comparison Between Pseudo- and True Panel Estimates 363
- 12.5. Vulnerability to Poverty Based on the Cross-sectional WSS and the Panel KLIP, 1999 and 2000 365
- 13.1. Variable Means, Standard Deviations, and Definitions 373
- 13.2. The Correlates of Happiness, 1995 and 2000 379
- 13.3A. Income Mobility in Russia, 1999–2000 381
- 13.3B. Income Mobility in the United States, 1979–1989 382

- 13.3C. Happiness Mobility in Russia, 1995–2000 382
- 13.4. First Difference Regression 383
- 13.5. The Effects of Happiness on Income 387
- 13.6. The Effects of Income on Happiness 388
- 13.7. The Effects of Happiness on Marriage Status, Employment, and Health 391
- 14.1. Selected Results from Time-series Cross-country Studies of Income Inequality 402
- 14.2. Selected Results from Time-series Cross-country Studies of Earnings Inequality 416
- 14.3. OECD Database on Earnings Dispersion (1993 Version) 430
- 14.4. Apparent Breaks in the Inequality Series Used by Alderson and Nielsen 434

Figures

- 4.1. Latent Class Model of Mobility 92
- 4.2. Big-Class and Non-Class Solutions of a Hypothetical Inequality Space 96
- 4.3. Micro-Class Solutions of a Hypothetical Inequality Space 101
- 5.1. Dimensions of Work as Sources of Contractual Hazard, Forms of Employment Contract, and Location of Classes 112
- 5.2. Coefficients for Effects of Class on Risks (log odds) of Experiencing Unemployment 1991–1999 114
- 5.3. Men in Full-time Employment in 1975—Median Gross Weekly Earnings in 1999 Prices 122
- 5.4. Men in Full-time Employment in 1999—Median Gross Weekly Earnings in 1999 Prices 123
- 5.5. Women in Full-time Employment in 1975—Median Gross Weekly Earnings in 1999 Prices 124
- 5.6. Women in Full-time Employment in 1999—Median Gross Earnings in 1999 Prices 125
- 5.7. Men in Class IV—Median Reported Annual Labor Income—1999–2000 128
- 6.1. Age/Time 138
- 6.2. Age/Time 138
- 6.3. Occupation/Time 139
- 8.1a. Effects of Mother’s Schooling—United States 209
- 8.1b. Effects of Father’s Schooling—United States 210
- 8.1c. Effects of Mother’s Schooling—Taiwan 211

- 8.1.d. Effects of Father's Schooling—Taiwan 212
- 8.2.a. Linear and Transition Effects of Father's Schooling—
United States 214
- 8.2.b. Linear and Transition Effects of Father's Schooling—
Taiwan 214
- 8.3.a. Linear and Step Effects of Mother's Schooling by Sex—
Taiwan 219
- 8.3.b. Linear and Step Effects of Mother's Schooling by Sex—
Taiwan 219
- 8.3.c. Linear and Step Effects of Father's Schooling by Sex—
Taiwan 220
- 8.3.d. Linear and Step Effects of Father's Schooling by Sex—
Taiwan 220
- 8.4.a. Effects of Sibship Size by Parent Transitions—Taiwan
Males 222
- 8.4.b. Effects of Sibship Size by Parent Transitions—Taiwan
Females 222
- 9.1. A Multiple Decision Tree 236
- 9.2. Pathways in the English and Welsh Educational Systems 241
- 10.1. The Basic Model 268
- 10.2. AFQT Model 269
- 10.3. Bock & Moore Model 271
- 10.4. New Model 273
- 11.1. Densities of Fitted and Actual Present Value of Earnings for
Overall Sample 313
- 11.2. Densities of Fitted and Actual Present Value of Earnings for People
Who Choose to Graduate from High School 314
- 11.3. Densities of Fitted and Actual Present Value of Earnings for People
Who Choose to Graduate from College 315
- 11.4. Densities of Factors and Their Normal Equivalents 316
- 11.5. Densities of "Ability" (Factor 1) by Schooling Level 317
- 11.6. Densities of Present Value of Earnings in the College
Sector 320
- 11.7. Densities of Present Value of Earnings in the High School
Sector 321
- 11.8. Densities of *Ex Post* Returns to College by Schooling Level
Chosen 324
- 11.9. Density of Monetary Value of Psychic Cost Both Overall and by
Schooling Level 326

- 11.10. Density of Agent's Forecast of the Present Value of High School Earnings Under Different Information Sets 328
- 11.11. Density of Agent's Forecast of the Present Value of College Earnings Under Different Information Sets 330
- 11.12. Densities of Agent's Forecast Gains in Present Value of Earnings Under Different Information Sets 331
- 11.13. Densities of Present Value of Lifetime Earnings Before and After Implementing Cross Subsidy Policy 332
- 11.14. Fraction of People Who Switch Schooling Levels When Tuition Is Cross-subsidized 336
- 12.1. Estimates of Cohort-Specific $\hat{\sigma}_{e_{it}}^2$ for the WSS and UWH Pseudo-panels 356
- 12.2. Measures of Vulnerability to Poverty, by Educational Attainment and by Sectors of Employment, for the WSS and UWH Pseudo-panels 358
- 12.3. Estimates of the Variance of Earning Innovation $\hat{\sigma}_{e_{it}}^2$ from Cross-sectional WSS and Panel KLIPS, 1999 and 2000 362
- 12.4. Estimates of the Variance of Earning Innovation $\hat{\sigma}_{e_{it}}^2$ Based on UWH: Pseudo- Versus True Panel Estimates 364
- 12.5. Vulnerability to Poverty Based on UWH: Pseudo- Versus True Panel Estimates, by Sectors of Employment 366
- 13.1. Happiness and Income per Capita, 1990s 377
- 14.1. Lorenz Curve for the Kuznets Model 420
- 14.2. Lorenz Curves for the Krugman-Wood Model 422
- 14.3. Lorenz Curves for a Four-Class Model 424
- 14.4. Gini Coefficient for the United States and the United Kingdom: Different Foci 435
